

### INVESTMENT OBJECTIVE

The fund aims to provide investors with a net-of-fee return of 4% per annum above the annual change in the South African Consumer Price Index, measured over rolling three-year periods. The portfolio is managed to comply with the statutory investment limits set for retirement funds in South Africa (Regulation 28).

### INVESTOR PROFILE

Given the fund's maximum 60% equity investment restriction, the fund is appropriate for conservative investors who are close to, or typically in, retirement and whose time horizon does not exceed five years. These investors may therefore seek lower levels of investment volatility and risk of short-term loss than those provided by a less conservative balanced fund.

**COMMENTARY**

- Global equities (+2.5% in US dollars) gained as US bourses again scaled all-time highs despite growing uncertainty around rising COVID-19 delta variant cases—surprise second-quarter earnings, dovish Fed comments at the Jackson Hole symposium and relatively unattractive credit and property valuations continue to support equities
- Developed market bond yields, including the US 10-year, were little changed despite the prospect of imminent US stimulus tapering—Chairman Powell continues to walk a fine monetary policy line, highlighting clear improvements in underlying economic growth, offset by rising inflation expectations and concerns about the delta variant
- The FTSE/JSE Capped All Share Index (-0.9% in rands) fell on sharply lower resources (-4.8%) and industrials (-4.5%) indices—largely offset by a surging financials sector (+12.8%) as market rotation into SA Inc. counters continued
- Core holdings in FirstRand (+13.9%) and Standard Bank (+20.4%) were the largest contributors to returns while Aspen (+8.6%) continued to advance—Naspers (-11.8%) detracted most as the Chinese IT regulatory crackdown negatively impacted Tencent's valuation, while luxury goods company Richemont (-14.5%) fell on negative sentiment on the wealthy Chinese consumer segment
- Foreign assets (-2.4% in rands) detracted as the currency strengthened through month end and the funds' Chinese tech and materials holdings weakened—in our view, these businesses present exceptional long-term value as they trade at deep discounts to their long-term earnings fundamentals
- The All Bond Index (+1.7%) advanced again on a combination of relatively high interest coupon payments and a flattening yield curve—the 12-year maturity bucket (+2.5%) outperformed as yields at the long end of the curve fell on the optically better debt/GDP ratio and positive sentiment towards high yielding global emerging market bonds
- The rand (+0.5% vs the US dollar) breached R15.0/\$ on broad-based dollar strength as markets [incorrectly] anticipated the US Federal Reserve would signal the timing of its next interest rate rising cycle—but the currency recovered on improved debt/GDP and fiscal deficit ratios after Stats SA estimated SA GDP to be 11% larger than previously reported

**FEE STRUCTURE**

The annual fee is based on portfolio performance with the daily rate being adjusted up or down based on the portfolio's one-year rolling return relative to that of its benchmark and is subject to a minimum fee rate. No fees are levied when the annual net-of-fee portfolio return falls below zero. Fees accrue in the Foord global funds as disclosed.

**PERFORMANCE FEES**

Performance fees align investor and manager return objectives by rewarding the manager for outperformance while penalising the manager for underperformance. Foord's performance fee structure increases or decreases the daily fee levied based on the over- or underperformance of the Foord unit trust portfolios relative to their benchmarks. When the portfolio return exceeds the benchmark return, the daily performance fee rate is increased proportionately. Similarly, underperformance causes the daily performance fee rate to decrease proportionately. Performance fee rates are not capped for the reason that outperformance is generally not earned smoothly.

The annual fee is adjusted up or down daily by the performance fee calculated as the difference between the rolling one-year net-of-fee return and the benchmark return for the same period, multiplied by the performance fee sharing rate.

**IMPORTANT INFORMATION FOR INVESTORS**

Foord Unit Trusts (RF) (Pty) Ltd (Foord Unit Trusts) is an approved CISCA Management Company (#10), regulated by the Financial Services Board. Portfolios are managed by Foord Asset Management (Pty) Ltd (Foord), an authorised Financial Services Provider (FSP: 578). The custodian/trustee of Foord Unit Trusts is RMB Custody and Trustee Services (a division of FirstRand Bank Limited), contactable on T: 087 736 1732, F: 0860 557 774, [www.rmb.co.za](http://www.rmb.co.za).

Collective Investment Schemes in Securities (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Performance is calculated for the portfolio. Individual investor performance may differ as a result of the actual investment date, the date of reinvestment and withholding taxes. Performance may be affected by changes in the market or economic conditions and legal, regulatory and tax requirements. Foord Unit Trusts does not provide any guarantee either with respect to the capital or the performance return of the investment. Unit trusts are traded at ruling prices and can engage in borrowing. Foord Unit Trusts does not engage in scrip lending. Commission and incentives may be paid and if so, this cost is not borne by the investor. A schedule of fees and charges and maximum commissions is available on request. Distributions may be subject to mandatory withholding taxes. Portfolio information is presented using effective exposures. A fund of funds invests only in other Collective Investment Scheme portfolios, which may levy their own charges, which could result in a higher fee structure. A feeder fund is a portfolio that, apart from assets in liquid form, consists solely of units in a single portfolio of a Collective Investment Scheme which could result in a higher fee structure. Foord Unit Trusts is authorised to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate.

**UNIT PRICE**

Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio. Forward pricing is used. Prices are determined at 15h00 each business day and are published daily on [www.foord.co.za](http://www.foord.co.za) and in national newspapers. The cut-off time for instruction is 14h00 each business day.

**TER**

A Total Expense Ratio (TER) is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average daily value of the portfolio. These expenses include the annual fee, VAT, audit fees, bank charges and costs (excluding trading costs) incurred in any underlying funds. Included in the TER, but separately disclosed, is a performance fee (or credit) resulting from overperformance (or underperformance) against the benchmark. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. Performance return information and prices are always stated net of the expenses, fees and charges included in the TER. The TER for the fund's financial year ended 28 February 2021 was 1.52%.

**FOREIGN INVESTMENT RISK**

The portfolio may include underlying foreign investments. Fluctuations or movements in exchange rates may cause the value of underlying foreign investments to go up or down. The underlying foreign investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restrictions and controls that may be imposed by the relevant authorities in the relevant countries.
